

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 5, between lines 11-15 of the specification with the following:

The lamp 2 shown in the present case is a gas discharge lamp which comprises a burner 21 with a discharge space in which the arc discharge constituting the actual light source 22 is excited between two electrodes, as well as a first and a second lamp end 23, 24 through which a supply current is introduced. At least the first lamp end 23 extends through the neck portion 13 of the reflector body 1 for fixation of the lamp 2. An exposed electrode 100 extends out of the first lamp end 23.
